

3. User's Guide

The following sections demonstrate the functions of the Aggravator HTML Editor.

3.1 Location

Once you have downloaded the HTML Editor, you'll need to decide where to store the icon. You will simply double click or right click and select "open".

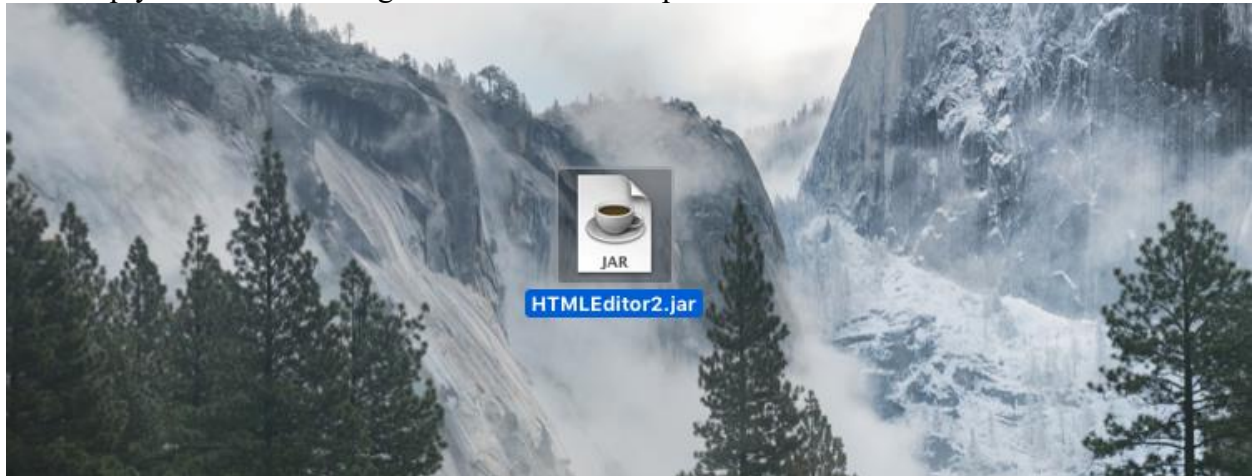

Figure 2 – Opening your HTML Editor for the first time.

3.2 HTML Editor Layout

Click "File" and select "new" from the dropdown menu.

Figure 3 – HTML Editor Layout

3.3 Creating a new HTML Document

Click “File” and select “new” from the dropdown menu

Figure 4 – Creating a new HTML File

3.4 Main and Secondary tabs

Selecting the “HTML Structure” tab in the main toolbar will change the tab options in the secondary toolbar.

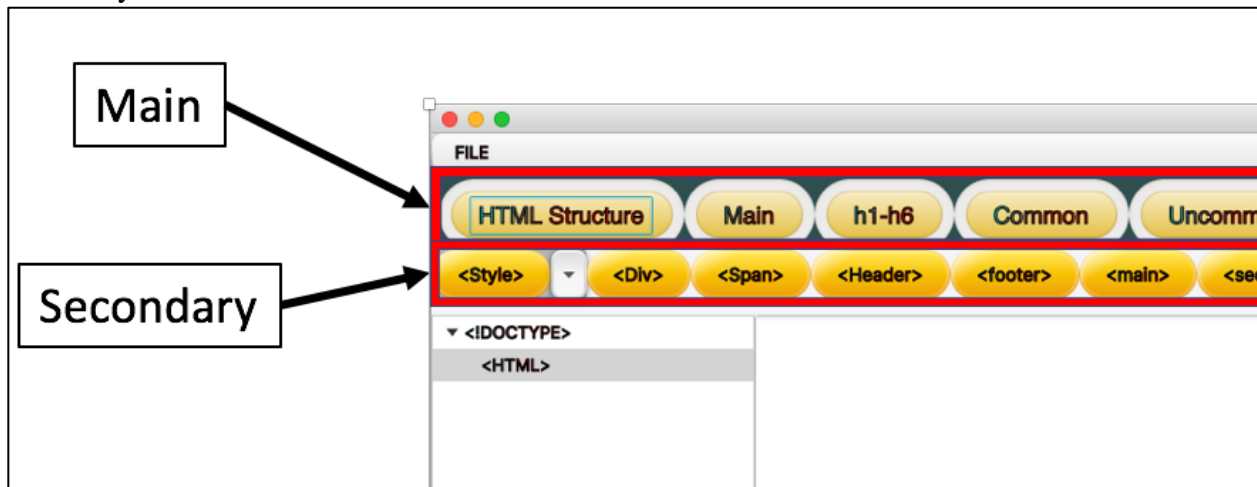

Figure 5 – Navigating Toolbars

3.5 Dropdown tab options

Select the desired tab option in the secondary toolbar that has a dropdown arrow

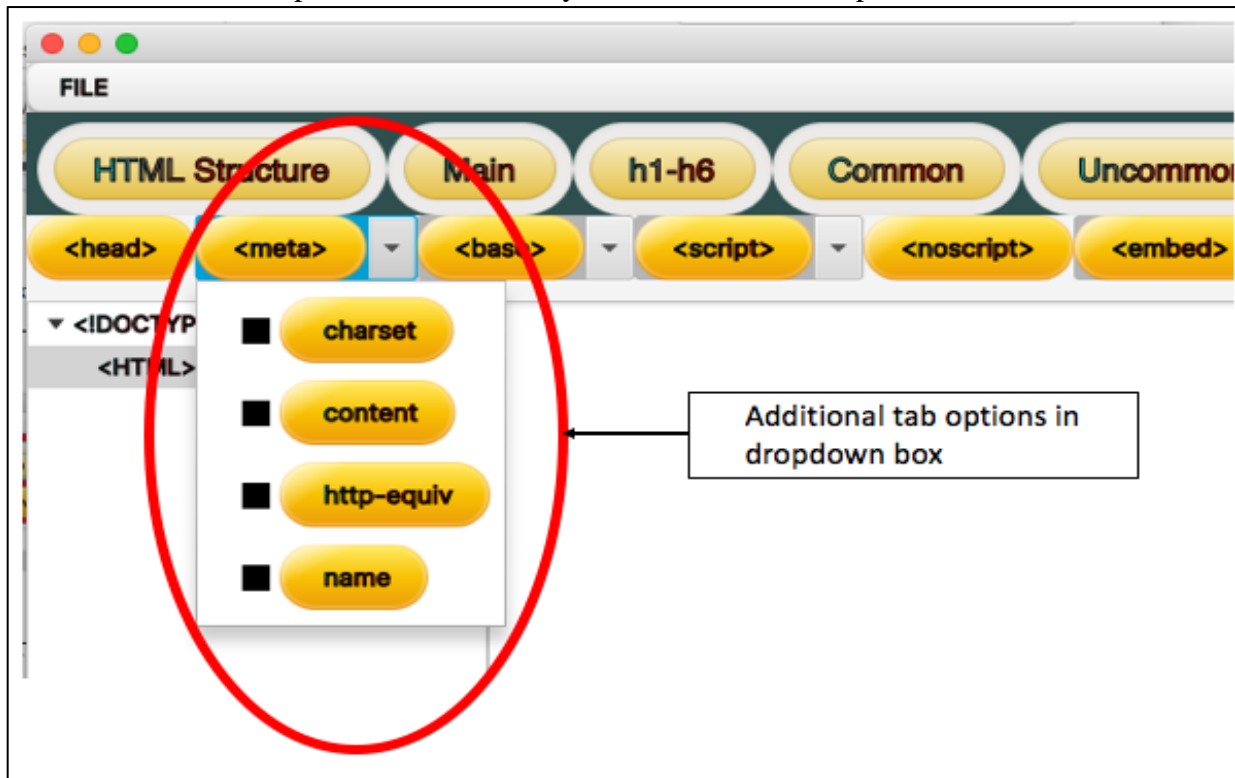

Figure 6 – Selecting tabs from dropdown box.

3.6 Selecting an option from the dropdown box

Where a dropdown is available click the desired option. A check mark will appear next to the chosen tag verifying selection.

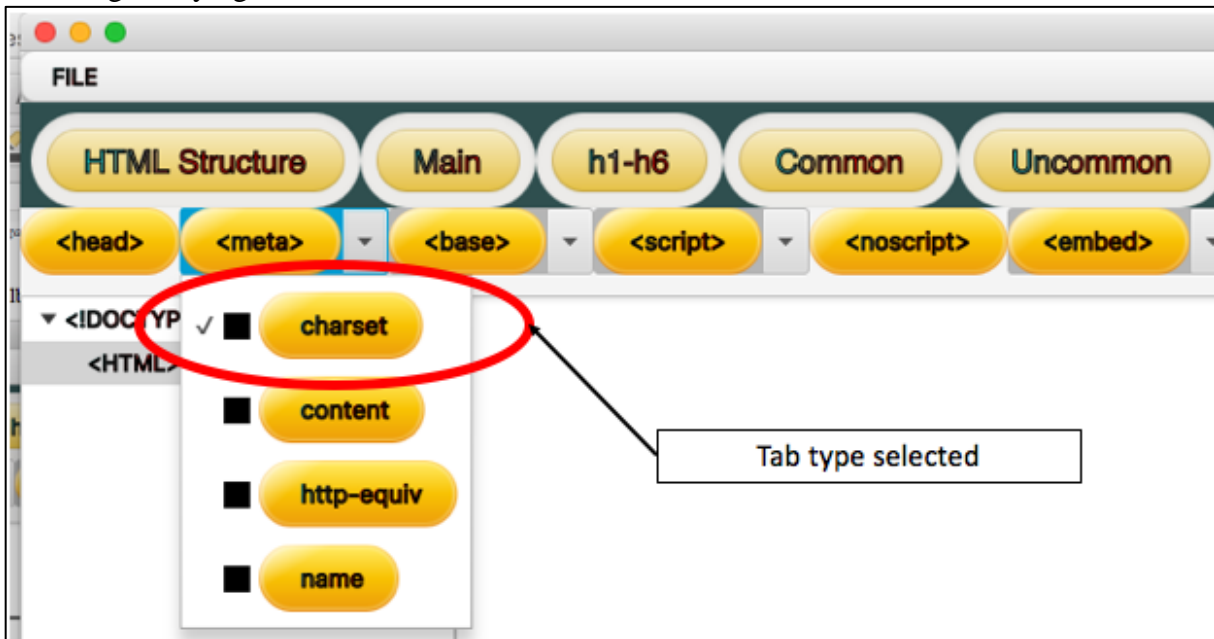

Figure 7 – Drilling down to specific tags

3.7 Adding HTML to text area

Once the chosen tags are selected click on the button for the desired tag to add both opening and closing tags to the text field. When a tag is selected the editor will populate an open and closing tag at the cursor's current location.
